DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
2. The disclosure is objected to because of the following informalities: Applicant should update the status of any applications cited in the specification of this application if any have changed (e.g. the continuity data; page 8, line 17; page 10, line 4).

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 20, 40 and 43 are rejected under 35 U.S.C. 102(b) as being anticipated by Von Post et al.
5. The patent to Von Post et al. discloses a cleaning implement (figures 7 and 8) having a handle 32 pivotally connected to a mop head 31, said mop head comprising securing members, 33, 34 capable of removably attaching an adapter plate 26 which has corresponding securing members 30, the adapter plate having a top and a bottom surface a leading and a trailing edge, said adapter plate comprising at least one securing element 29 capable of removably securing a

cleaning sheet to said adapter plate and wherein the adapter plate is removably attached to the mop head.

Allowable Subject Matter

6. Claims 2-19, 21-37, 41 and 42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. It is believed that the previous withdrawn claims can be rejoined as they depend from an objected generic claim.

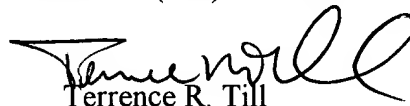

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Thomas, Nash, Murphy, Saltzstein, Hsu, Garcia, Swain and Japanese patent to Sonoda show the current state of the art in sheet holding mops.
